EXPERIENCE

TUTORJAM | SOFTWARE DEVELOPER

May 2014 – Aug 2014 | Waterloo, ON

- Created the entire application process used by **1000s** of tutors to apply.
- Developed an end to end system allowing admin to edit, remove and publish tutor profiles from **SchoolTutoring** to the online tutor catalogue on WordPress.
- Added features on **YuJa** such as enabling users to upload audio files to learning channel and sending periodic digest emails.
- Worked with J2EE, EJB, JSP, JDBC, PHP, HTML, CSS, jQuery, JBoss, AWS.

PROJECTS

SKIP THE WAIT | FRONTEND & BACKEND DEVELOPER

Sep 2014 | Waterloo, ON

A web tool that allows patients to queue in before physically going to a walk-in clinic. Worked with **Node.js** and **MongoDB** to create the server and **Angular.js**, **HTML** and **CSS** for the client. Created API endpoints for the client to access and used Google Maps API to display the clinics near the patient's location for them to queue into.

TRANSIT CHECK | BACKEND DEVELOPER

Jun 2014 | Waterloo, ON

A web application that solves the day-to-day problems of unexpected delays in transit buses. Worked with **Node.js** and **MongoDB** to develop the backend. Handled requests using **Express.js**, authentication using **Passport.js** and database calls using **Mongoose**. <http://battlehacktoronto-ayushbhagat.rhcloud.com/>

WHITEBOARD | FRONTEND DEVELOPER

Mar 2014 | Waterloo, ON

Winner of the **Best Design Award** at Hack-Waterloo. A tool for developers to search and connect with other developers. Worked with **HTML**, **CSS** and **jQuery** to develop the frontend as well as **Node.js** and **MongoDB** for the backend.

BUBBLESCAPE | ANDROID DEVELOPER

Aug 2012 – Sep 2012 | Brampton, ON

An original android game developed using **Eclipse**. Developed a method for rotating the game objects and created game animations. Received **500+** installs on Google Play. <https://play.google.com/store/apps/details?id=com.RICE&hl=en>

PURCHASE CHECK | ANDROID DEVELOPER

Aug 2014 - Current | Brampton, ON

An android application that can be used to manage warranties and receipts. Is currently being developed using **Android** technologies.
